### 5:30-6:00 Introductions and overview

- Project overview
- Team concept
  - At every step of the way, individual landowners will have full authority over who's on their property and when, and any actions taken. You can stop at any point.
  - Goal is to get a contiguous area that firefighters can stay to fight fire in, as opposed to a less effective discontinuous patchwork.
  - We want to build a team with you to reach our collective goals.
  - No requirement for participation, but we'll need to know whether individuals are on board at critical junctures.
  - Go over communication protocol, team member's roles/responsibilities (pages 5-7 of Project Packet).

### 6:00-6:20 Project process

- Discuss project process and expected timeline (summary pages 4-5, details 8-9 of Project Packet).
- Opportunities for input and/or decisions
  - All project partners have liability insurance; property owners are indemnified.
  - We will conduct initial property tours with interested landowners to discuss project goals and property-specific ideas and concerns.
  - Forest management plans will be reviewed by each landowner as they are written.
  - Deadlines for comments will be made and it is important that these deadlines are respected.
  - After trees are marked (only with removable tape), each landowner will provide input during a property tour on their land.
  - Landowners will sign-off on agreed-upon actions.

### 6:20-7:00 Goals discussion

- Discuss community goals
  - What are our shared goals? Go around room and ask for individual goals.
  - What are your priorities for the project? What outcomes would you like to see when the project is finished?

### 7:00-7:30 Next steps

- Distribute and explain Participation Agreements.
- Property tour sign-ups for those who know they are interested.
- Post-meeting: Watershed Center will post all meeting notes and materials on website.
